EVENT TIME 24 hrs	COMMENTS	EVENT TIME 24 hrs	COMMENTS
1010	Whitesided dolphins ided by white patch on hind flank, black eye patch and short snout. Two calves were in group. Porpoising along behind another fishing vessel that was steaming to the northeast.		
1011	Photographed the underside of flukes (see photo log). Flukes had white pattern, scalloped edge. Saw long, white pectoral flippers through the water. As we were hauling in gear, the whale approached the vessel within 250 meters and lifted its flukes when it dove.		
1114	Three finback whales were sighted in the distance. Tall blows. Swimming rapidly, headed along one direction.
